2019-2020

55%

SSC : High School (Late Lalaseth Bihani Vidya Mandir -Rahuri, Ahmednagar)

2017-2018

74%

Experience

SevenMentor & Training Pvt Ltd

Backend developer- Java, Hibernate, spring boot, Mysql

During my internship at SevenMentor & Training Pvt Ltd, I developed the "Eblog" blogging platform using Java, Spring Boot, Hibernate, and MySQL. My responsibilities included implementing CRUD operations for blog posts, designing a responsive UI with HTML, CSS, and JavaScript, managing data storage with Hibernate ORM, and deploying the application on a live server to ensure smooth operation and performance.

Projects

Eblog using springboot

Technology - HTML, CSS, JavaScript, Java, Spring Boot, and MySQL

Developed a comprehensive blogging platform, "Eblog," using Java, Spring Boot, Hibernate, and MySQL. Implemented key features such as user authentication, CRUD operations for blog posts, a commenting system, and search functionality. Designed a responsive user interface with HTML, CSS, and JavaScript, and ensured efficient data management with Hibernate ORM.

News website

Technology - HTML, CSS, JavaScript

I'm building a news website using HTML, CSS, and JavaScript, fetching live data from an API to show the latest news. My tasks include making sure the site works well on all devices, improving search so users can find articles easily, and smoothly connecting the API for news updates.
